PACIFIC ENVIROMIN LIMITED EPC APPLICATIONS – BOWEN BASIN

Continuing the Company's focus on identifying and developing thermal, coking and PCI coal deposits in Queensland, Pacific Enviromin Limited has identified and successfully applied for EPCs in three additional areas. The applications are non-competing and the company expects the exploration permits to be granted in due course.

EPCs 2035, 2036 and 2037 are located in the Bowen Basin close to existing infrastructure and mines.

The Company continues its geological assessment of the suite of existing tenements which lie within existing coal basins in Queensland. The Company has focussed its attention on areas with established infrastructure and the ability to develop smaller mining operations and which lend themselves to early mine development.

Costs associated with any potential mine development could be substantially reduced due to mine location and the ability to export using established rail, road and port networks and infrastructure.

It is anticipated that the geological assessment of the existing tenements will be completed shortly which will enable the Company to consider the optimum strategy for their further value adding.

John Bovard
Chairman

Pacific Enviromin Limited – Tenement Summary

Project Name	Tenement No.	Application Date	Date Granted	Date Expires	Sub blocks	Area (km ²)
West German Creek	1548	8/8/08			12	37.97
