ADDITIONAL INFORMATION

29 January 2010

PEV's calcium bentonite mine in central Queensland (near Springsure) is producing small quantities of bentonite for sale to regional agricultural and mine site markets. Agricultural trials are continuing with CSR Sugar, with results expected at harvest in May this year.

In recent times following the acquisition of Area Coal Pty Ltd, the Company has focused on unlocking the value of the recently acquired coal tenements. In most cases these coal exploration tenements are located in recognised coal basins and are believed to have the potential for economic coal discoveries. Through its subsidiaries Mining Investments One Pty Ltd and Area Coal Pty Ltd the Company now has 32 EPCs and EPC applications located in Queensland's Bowen, Gallilee, Surat and Clarence-Moreton Basins. EPC 1827 has been granted, four applications are subject to grant. Of the remainder, eighteen non-competing applications and nine competing applications with other companies have been lodged.

PEV is in discussion with several interested parties for the exploitation of its coal EPC assets by one, or a combination, of farm-in, joint venture or sale.

To enable the Company to move forward with its business plans, we are addressing its capital requirements in several ways. It is anticipated that a statement will be announced to the market in the near future.
